

The PRISim Suite® LaserLiveTrainer is the ultimate judgement evaluation and force options training simulator. By design, it creates a safe, effective and realistic learning environment for law enforcement, military and security professionals to practice shooting with their own weapons, or with laser-modified weapons and less-lethal devices.

PRISim Suite LaserLiveTrainer comes with over 500 pre-installed branching situations to meet your training requirements. PRISim Suite delivers all the hard realities of a real operational encounter. The judgement calls, indecision, sudden fear, partial understanding, blind side surprise and eye-blink response are all part of the training experience that conditions the trainee for survival.

Train to win with the PRISim Suite LaserLiveTrainer.

PRISim Suite LaserLiveTrainer

Key Features

- Highly performance training system supports laser or live-firing
- Durable platform designed to support all PRISim Suite training programs including judgement, force options, marksmanship and qualification needs
- Live fire sensors track rounds up to 3,248 fps
